

EARTH HOUR OTTER LAKE

Saturday, August 17, 2013

10:00 p.m. - 12:00 a.m.

LIGHTS OUT!

Let's See The Lake at its Finest!

Ever wonder what our beautiful lake looked like before the arrival of lights and electricity?

Let's all turn off our lights on **Saturday, August 17 at 10:00 p.m.** and witness the natural beauty of our lake under a starry sky.

Turn off all your stereos, TVs, and radios... and listen to the pristine sound of our natural wilderness.

See what Otter Lake used to be like before electricity and help prevent excessive climate change. Yes, even in cottage country!

How amazing would it be to see fellow cottagers, neighbours, and friends turn off all their lights at the same moment of time, all over the lake.

Together let us truly enjoy how spectacular this place can be for one summer's night.

Help us make this happen by spreading the word to your friends and neighbours, **Saturday, August 17 from 10:00 p.m. - midnight.**
